Cyber Solutions • Enterprise Consulting • Managed IT/Security

Cybersecurity

Certifications	
International Information System Security Certification Consortium (CISSP)	CompTIA IT PenTest+ Certification
EC-Council Certified Ethical Hacker (CEH)	CompTIA Advanced Security Practitioner (CASP) Certification
EC-Council Certified Computer Hacking Forensics Investigator (CHFI)	CompTIA Project +
EC-Council Certified Incident Handler	CompTIA A+ Certification
EC-Council Certified Encryption Specialist	

Past Performance

Assessments: Performed Assessment & Authorization process for Unclassified and Classified networks using the eMASS system to evaluate, test, and apply Risk Management Framework controls to ensure all systems meet DCSA and OTI compliance requirements.

Managed Security: Managed five national security information systems provided security guidance related to (e.g. JSIG, ICD 503, RMF, DAAPM, or NISPOM).

Delivered the designed, configured, and implemented parameters for installation and testing of local area network (LAN), wide area network (WAN), hubs, routers, switches, controllers, and other related networking equipment which increased the organizations' cybersecurity compliance rate from 70% to 93% within 90-days of arriving at the organization.

Advisory Services: Performed an IT Department Risk Assessment for the purpose of identifying threats and vulnerabilities within the IT infrastructure that would negatively impact business operations, regulations, and audit compliancy.

Digital Transformation: Implemented a five-year cloud-based subscription integrated solution for First Responders Body Camera (1300), In-Car Video (300) and Interview Room (40) video recording systems and video storage for a single managed solution to ensure federal, state, and local compliancy. The solution provided more than \$750K/year savings in storage management while also ensuring a 30-month refresh cycle of all equipment.
